# What are the main reasons for your rating of the overall experience in this unit?

#### Comments

This unit dive into Artificial Intelligence as it dives into deep understanding not only the technical side of business but ethics which is crucial in this modernized era.

The learning outcome and experience

Michael Borck redesigned the unit materials this semester to make everything up—do—date. I absolutely enjoyed attending the classes both offline and online as the discussions were relevant to the current practices around the world.

Meaningless unit with meaningless assessments. Teaching us the concepts behind AI, and then? No technical skills involved, all theories. I specialize in Data Analytics and Visualization, not the concepts behind AI. Remove this unit!

This unit content is not very satisfactory, but the knowledge and insights from lecturer make this unit a high rating.

The unit is more like AI exploration unit with no regards to knowledge management. It seems out of track a bit...

Specialy the lecturer was fantastic and supported me with all that was required. Having such a open minded and considerate teacher is a blessing.

Assessments were a little bit unclear, but overall, great unit.

thanks michael borck i learned alot from you
